WE HELP BUILD A BETTER WORLD

Construction & Infrastructure Solutions

About Us

PDL Group is a privately owned EPC and industrial services company founded in 2004 in Baku, Azerbaijan.

With over 20 years of experience, we deliver engineering, procurement, construction, maintenance, and lifecycle support across energy, industrial, and infrastructure sectors.

Originally established as an industrial equipment supplier, the company has evolved into a multidisciplinary partner executing complex projects under real operating conditions.

Today, we support local and international clients through in-country execution, technical support, and integrated project delivery.

Our Expertise

Integrated engineering, procurement, construction, maintenance, and technical services delivered across the full project lifecycle.

Operating under real site conditions, we combine multidisciplinary expertise, local execution capability, and disciplined project management to support complex industrial, energy, and infrastructure projects.

This practical approach enables safe execution, operational continuity, and reliable project delivery aligned with client and project requirements.

Core Services

- ✓ Project & Construction Management
- ✓ Integrated Engineering Solutions
- ✓ Brownfield Modifications
- ✓ Procurement & Supply Solutions
- ✓ Electrical & Instrumentation Works
- ✓ Maintenance, Inspection & Technical Services

Energy and Civil Infrastructure

Integrated engineering, construction, and technical services for critical energy and infrastructure projects.

Experience across transportation, water management, pipeline systems, and power generation facilities enables successful delivery under diverse site conditions.

Key Areas:

- Roads & Highways
- Railways & Stations
- Bridges & Underground Structures
- Irrigation & Water Infrastructure
- Pipeline Systems
- Thermal, Hydro, & Gas Power Plants
- Wind & Solar Power Plants

✓ We provide integrated solutions for sustainable infrastructure and the energy of the future.

Hajigabul Irrigation Infrastructure Project

Supporting sustainable agricultural development through large-scale irrigation infrastructure.

Scope of work:

- Construction and commissioning of 4 floating pump stations
- Installation of 11+ km steel pipeline system (Ø1420×14 mm)
- Construction of 7000 m reinforced concrete irrigation canal
- Development of 5000 m³ water reservoir
- Installation of stationary pump stations and supporting infrastructure

Project Impact

Improved irrigation capacity, enhanced water accessibility, and strengthened long-term agricultural productivity across the region.

Zardab Irrigation Infrastructure Project

Improving irrigation reliability and supporting sustainable agricultural development across an 834-hectare area.

Scope of work:

- Pontoon construction and installation works
- Construction of supporting infrastructure
- Installation of 3800 m steel pipelines
- Ultrasonic testing (UT) of welded joints

Project Impact

Enhanced water distribution efficiency supporting agricultural productivity and long-term regional development.

Khachmaz Irrigation Infrastructure Project

Modernization of irrigation infrastructure to improve water supply reliability and support sustainable agricultural development in the region.

Scope of work:

- Rehabilitation of six reservoirs
- Installation of 4800 m HDPE pipeline
- Construction of pumping station and supporting facilities

Expected Impact

The project will improve irrigation reliability, enhance water resource management, and support sustainable agricultural development across the region.

Sheki Irrigation Canal Reconstruction Project

Modernization of irrigation infrastructure to improve water efficiency and support agricultural productivity.

Scope of work:

- Reconstruction of Cayirliarx canal
- Replacement with reinforced concrete structure
- Upgrading associated engineering systems

Expected Impact

The project is expected to reduce water losses, improve irrigation efficiency, and enhance agricultural productivity.

Jabrayil Solar Power Infrastructure Project

Supporting the development of renewable energy infrastructure through large-scale construction activities.

Scope of work:

- 930,000+ m² Earthworks
- 87,014 Piles Installed
- 20,603 m Perimeter Fencing
- 494 m³ Concrete Works

Expected Impact

The project is expected to support the expansion of renewable energy generation and long-term sustainable infrastructure development.

Modular Construction Capability

107 Projects Delivered Across Azerbaijan

PDL Group delivers modular construction solutions enabling rapid deployment, efficient installation, and reliable performance in remote locations.

Key Advantages

- ✓ Fast Implementation
- ✓ Cost Efficiency
- ✓ Simplified Logistics
- ✓ Scalable Solutions

Efficient Supply Chain Management

PDL Group creates added value for its clients through professional supply chain management.

We carefully select and audit suppliers, ensuring product quality, compliance with technical requirements, and the optimal balance between price and quality. Our procurement department leverages technical expertise and a trusted partner network to guarantee quality control, accuracy of execution, and on-time delivery.

Through partnerships with OEM manufacturers and special pricing agreements, we provide our clients with favorable terms and additional discounts.

Benefits for Clients:

- ✓ Reduced operational costs
- ✓ Optimized procurement processes
- ✓ Guaranteed quality and technical compliance
- ✓ Reliable and uninterrupted supply chain performance

Why Choose PDL Group

✓ Reliable Execution

Projects delivered under real operating conditions

✓ Integrated Capability

Engineering, procurement, construction, and maintenance under one partner

✓ Technical Expertise

Experienced teams supported by modern technologies and OEM partnerships

✓ Long-Term Support

Sustaining performance beyond project completion

**Trusted by
Industry Operators**

Supporting Critical
Infrastructure Projects across
Construction, Energy &
Industrial Sectors.

Our Partners

We collaborate with leading global Original Equipment Manufacturers (OEMs), enabling us to deliver technologically advanced solutions that meet the highest international standards.

Partnerships with trusted suppliers allow us to ensure:

✓ **Consistent quality**

only certified products that meet international verification standards

✓ **Optimal conditions**

competitive pricing and flexible delivery terms

✓ **Technical support**

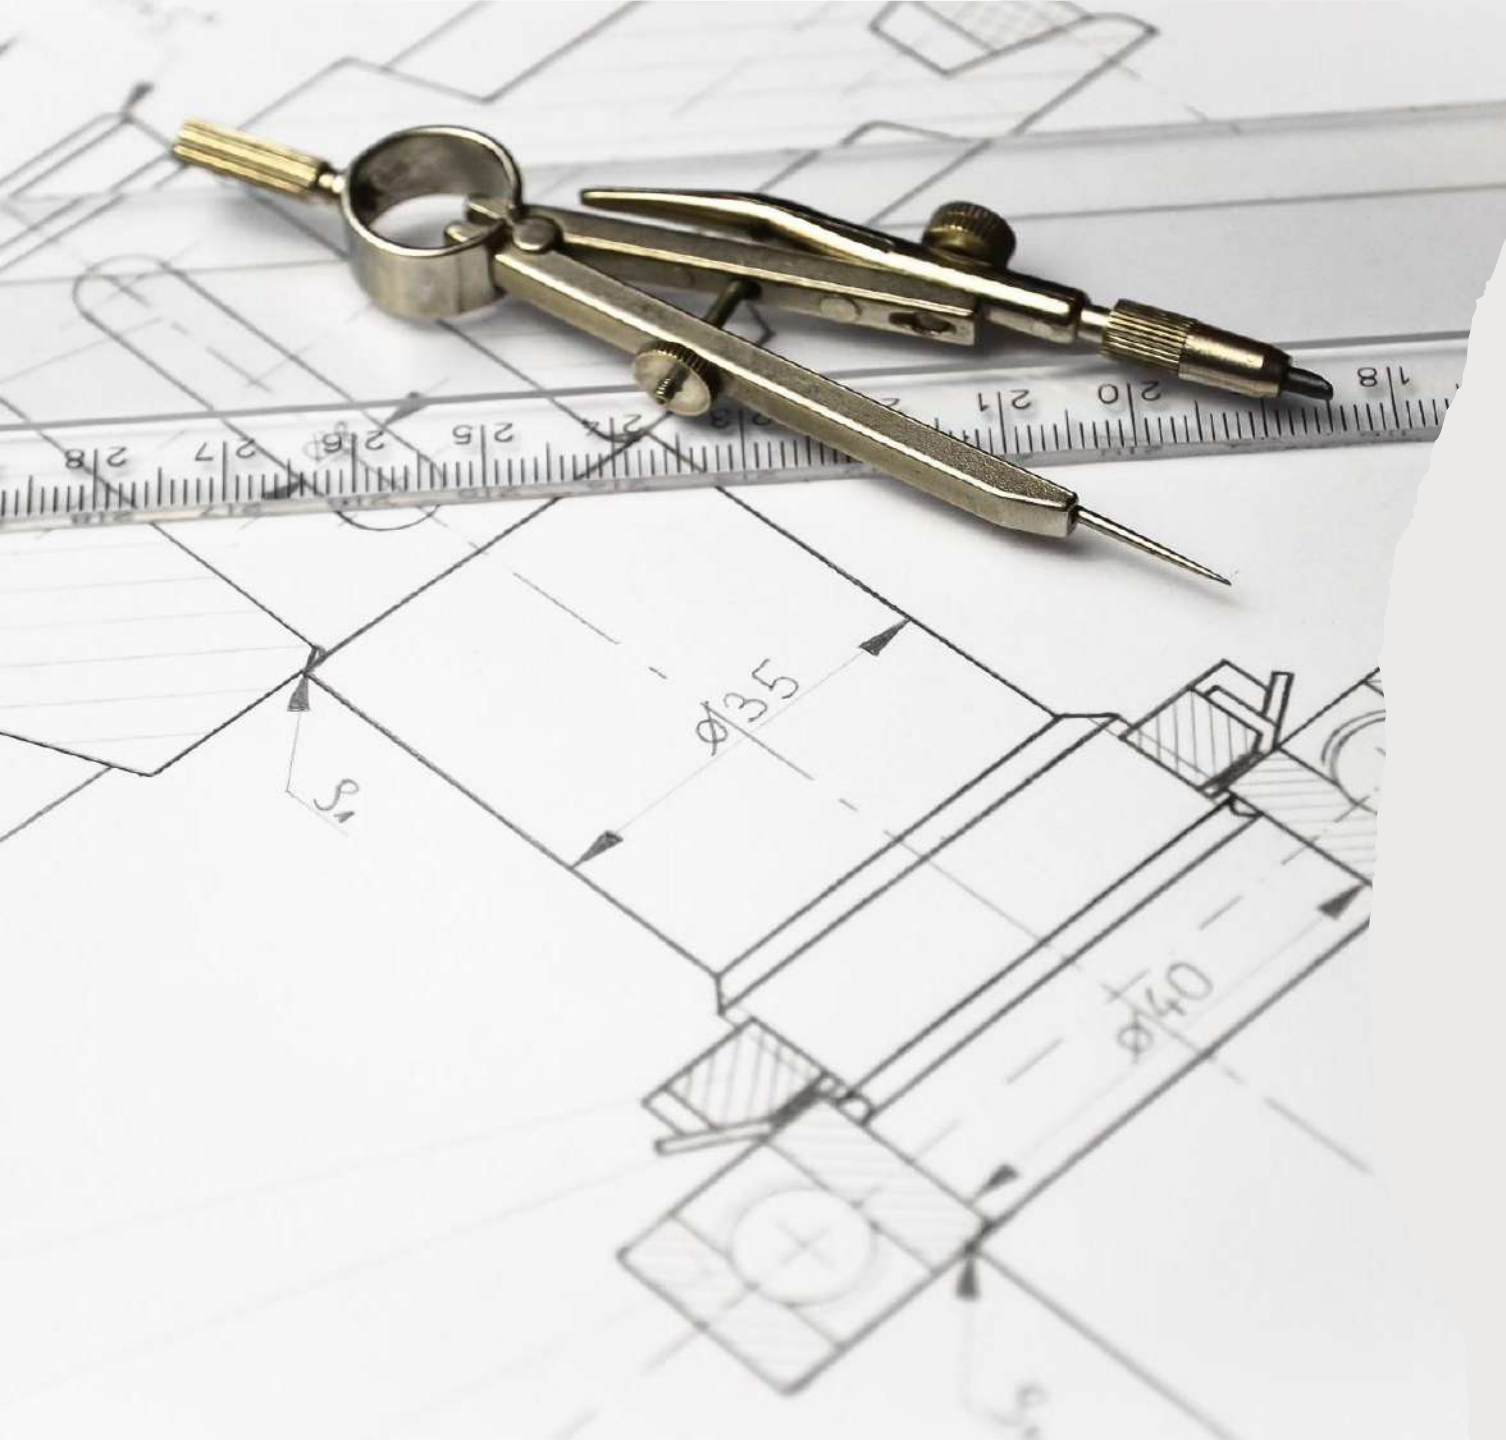

with direct access to manufacturer expertise and specialized training

✓ **Guaranteed reliability**

official documentation, on-time delivery, and full compliance with industry requirements

This collaboration ensures compatibility, reliability, and long-term efficiency of our solutions at every stage of project execution.
